What else do we do?

As a specialist lighting distributor, we are also able to offer competitive prices for branded Theatre lamps from manufacturers such as Maquet (formerly Hanaulux), ALM and Berchtold but also, we offer excellent quality generic lamps which like most of our generic lamps, are manufactured in Japan to extremely high standards.

This is just a small sample of the lamps we are able to offer. We can also offer a range of replacement LED's for diagnostic medical devices.

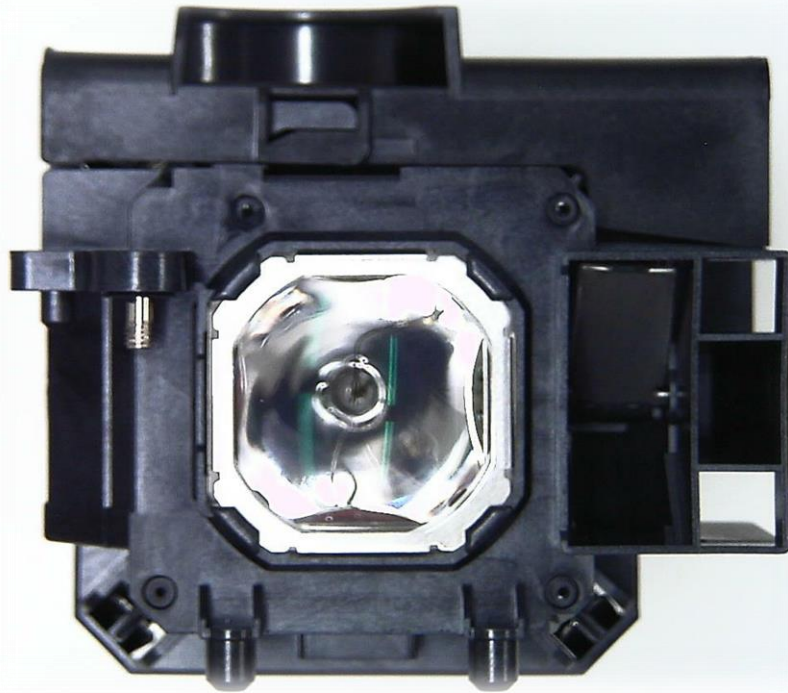

Lamp Cross Referencing

On the centre pages you will find a comprehensive but not complete list of equipment manufacturers and model numbers, next to those we have matched our part number to aid in identification.

If your lamp is not registered on the list, please do let us know as we are always updating this brochure to keep the information contained within it current.

At the back you will find a notes page where you can jot down any comments or prices we have offered

Projector Lamps

Due to cost restraints on the NHS, supplies departments are becoming more proactive looking for better prices. Did you know that we can offer competitive rates for projector lamps in both OEM and Generic.

By consolidating your purchasing you are able to cut down on carriage charges, reduce paperwork and of course help the environment.

If you are looking for a variety of lamps why not give us a try. Let us help you save money. Our large stocks and direct access to manufacturers allows us to supply these lamps quickly and usually within 24-48 hours (unless advised in advance).

The lamp pictured above is only an example and does not represent all projector lamps. All we need is the make and model to give you a quotation.

Call Kathy on 0116 2342921 or email hls@hybec.com with the details.

Fibre Optic Cables and Ends

Fibre optic cables are available in a variety of lengths.

It is important we know the core diameter required. This is usually either 3.5mm or 4.8mm.

If you require a different size, please let us know.

Light Source End Type A	Instrument End Type B
H572  ACM & British, Eschmann, Downs	H573  ACM & British
H567  GU & Storz	H574  Wolff
H568  Heine	H564  Zeiss OPMI
H566  Fuji, Olympus, Rimmer	H559  Downs
H569  Pentax	H575  Aesculap, Dyonics, Olympus, Storz, GU
H565  Dyonics, Stryker, Wolff	H557  Wolff with clip

Germicidal Lamps

Did you know that Hybec (Hospital Lamp Supplies) also offers a wide range of germicidal lamps used in air, water and surface sterilisation? Germicidal lamps operate at 254nm on the spectral chart and are also known as UVC.

No matter what your requirement is, we are always on hand for a competitive quotation. We can provide you with lamps from some of the major manufacturers such as Osram and Philips, and our own Hybec brand lamps (pictured above) which are manufactured in Japan to the highest standards.

We can also offer CCFL Germicidal lamps which are significantly smaller than the normal HCFL tubes and can be adapted to fit in compact spaces such as handheld devices. The benefits of using these CCFL lamps are their long life which is around 10000 – 40000 hours depending on the design.

Give us a call with your requirements and we will be happy to help.
