

Hybec Replacement Projector Lamps

Based in Leicester, Hospital Lamp Supplies can now offer you Genuine Replacement Projector Lamps for your projectors and rear projection television equipment.

Hybec Original Lamps

All Hybec original lamp modules (lamp & cage) are supplied with original Osram and Philips bulbs. These are a cost effective alternative to OEM lamps because they are identical. Being manufactured to ISO9001 standards ensures a high performance at affordable prices including a 120 day peace of mind warranty.

Hybec Original Replacement Lamps offer high quality and performance with the security of knowing that you are purchasing a product approved by the original lamp manufacturer.

OEM (Original Equipment Manufacturer) Replacement Lamps

These manufacturers' original replacement lamps are produced by the original projector or rear projection television manufacturer. Lamps and bulbs are supplied by the world's leading lamp manufacturers such as Philips and Osram.

Compatible Lamps (Copy Lamps)

These lamps are manufactured by unregulated producers. Tests have shown that these lamps do not offer the same performance or quality of product as those supplied with the original projector when new. Output and service life is reduced resulting in false economy for the purchaser. All lamps operate under high pressure and extreme temperatures and therefore it is important that safety is not compromised.

Simply tell us the make and model of your projector and we will identify the part number of the lamp required. **Call 0116 234 2929 or e-mail hls@hybec.com**

**Cannon - Epson - Hewlett Packard HP – IBM –
